

Open Position – Network Engineer

Responsibilities

- Network design and implementation. Specific challenges include interoperability between hardware from multiple niche vendors and complex multicast traffic.
- Design data centers for performance and maintainability. We have several Data Center locations in the US and almost all physical work is done by third-party remote staff.
- Secondary responsibility for support of Linux servers and workstations. Windows administration experience is helpful, but not required.
- Develop processes to automate/monitor/audit the system.
- Evaluate and recommend new technology for possible use.

Requirements

- Bachelor's degree in Information Technology, Computer Science, or a related field.
- Prefer Cisco CCIE certification or equivalent experience
- Scripting/programming experience, preferably Python
- Excellent communication skills, both verbal and written.
- We hire for Aptitude, Character, and Enthusiasm. We are looking for associates who are eager to learn and move up as the firm grows.

Benefits

- **Base salary \$50k to \$150k**, depending on position & experience.
- **Bonus Pool.** Incentive comp can be highly rewarding. All associates are eligible to participate in our annual discretionary bonus pool. Bonuses are based on trading profits, individual performance and other criteria set by the board. Bonus payouts are not guaranteed.
- Benefits package available to all associates including health insurance, paid-time-off, etc.
- Free lunch. The company provides lunch daily with rotating caterers.

Beating Wall Street from Kansas City

- Tradebot Systems is a proprietary trading firm: we trade stock for our own account and do not have customers. We are registered as a broker-dealer with the SEC. We frequently account for roughly 5% of all stock trading in America.
- Our internally developed, low-latency trading system is world class. We continually test and integrate cutting-edge hardware to facilitate trading and research. When market data changes, our system can react in nanoseconds. Our trading decisions are based on analyzing "big data" contained in our 4+ petabyte cluster to determine when we have a statistical edge.
- Tradebot was born in 1999. We have 60+ associates and they all work out of our headquarters in Kansas City.

Applicants should email their resume and ACT score to work@tradebotsystems.com. Please refer questions to Jennifer Tomlinson, Director of Human Resources at 816.285.3351. If you know someone who may be interested, thank you for passing along this information.
